

COMPANY OVERVIEW

BEL Valves designs and manufactures high integrity valves, actuators and controls for subsea, surface and onshore applications.

We have over 50 years of expertise, supplying a number of solution led design firsts including the eccentric ball valve for sandy conditions, subsea HIPPS equipment and HP/HT ultra-deep qualifications for critical service conditions.

BEL Valves continues to maintain a clear focus on developing solutions, innovations and technology through early project engagement, supported from commercial offices worldwide and manufacturing facilities in Newcastle upon Tyne and Milan.

SECTORS

SURFACE

We have designed, manufactured and maintained surface valves in onshore and offshore applications for over 50 years. Our surface products are designed, qualified and installed from 1/2" to 56" bore size and from ANSI 150 – API 15,000 pressure ratings.

SUBSEA

The design and manufacture of valves for the critical subsea environment requires significant engineering expertise. Our subsea expertise extends to the design, qualification and installation of products from 1/2" to 30" bore size, water depths to 4,500m and pressures up to API 15,000.

PIPELINE

BEL Valves' large bore products can be supplied for either subsea or surface applications and have historically been installed on pipelines up to 56" in diameter.

MANUFACTURING FACILITIES

NEWCASTLE

BEL Valves' integrated production facility in Newcastle upon Tyne offers design, assembly, testing, after market services and training.

- ➔ 54,300m² total site area
- ➔ 4,240m² total office area

MILAN

The BEL Valves' facility in Milan is a centre of excellence for the production of surface equipment for downstream, midstream and upstream applications.

- ➔ 5,500 m² plant
- ➔ 20 to 60 ton lifting capacity

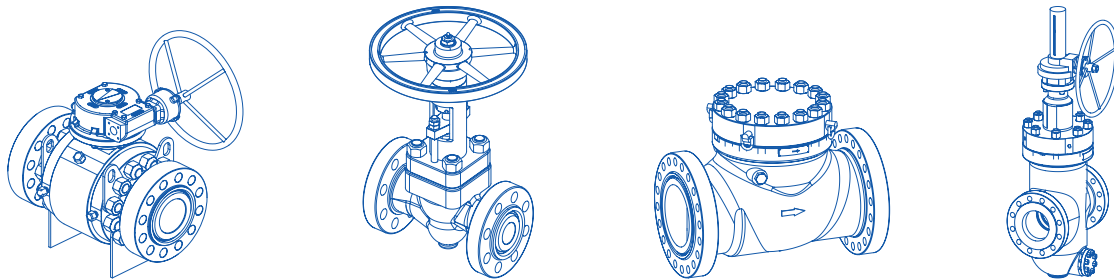

SURFACE VALVES

We are a reliable provider of high quality surface valves for petrochemical, onshore, offshore and midstream oil and gas applications. Our in-house teams have the knowledge and expertise to design, manufacture and maintain valves for these critical markets.

PRODUCTS

- ➔ Side Entry Ball Valve
- ➔ Top Entry Ball Valve
- ➔ Floating Ball Valve
- ➔ Through Conduit Slab Gate Valve
- ➔ Through Conduit Expanding Gate Valve
- ➔ Fabricated Gate Valve
- ➔ Swing Check Valve
- ➔ Piston Check Valve
- ➔ Axial Flow Check Valve
- ➔ Globe Valve
- ➔ Butterfly Valve
- ➔ Needle Valve

APPLICATIONS

- Boarding skid
- FPSO
- HIPPS
- HP/HT
- Isolation
- Metering skids
- Mooring systems
- Pig launching and receiving
- Pipeline
- Production platform
- Onshore receiving terminal

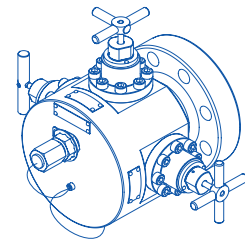

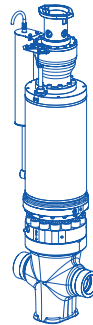

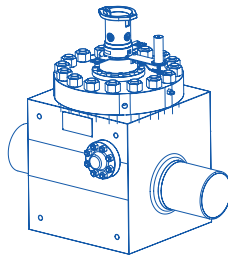

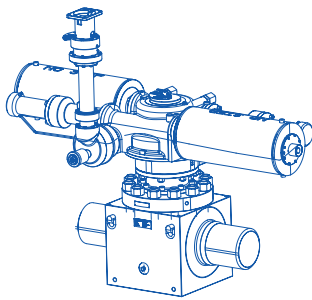

SUBSEA VALVES

We are a reliable provider of high quality subsea valves for oil and gas applications. Our in-house teams have the knowledge and expertise to design, manufacture and maintain valves for these critical markets.

PRODUCTS

- ➔ Side Entry Ball Valve
- ➔ Top Entry Ball Valve
- ➔ Fully Welded Ball Valve
- ➔ Through Conduit Slab Gate Valve
- ➔ Through Conduit Expanding Gate Valve
- ➔ Swing Check Valve
- ➔ Piston Check Valve
- ➔ Axial Flow Check Valve
- ➔ Rotary Disc Valve
- ➔ Needle Valve

APPLICATIONS

- Emergency shut down
- Flow-line
- HIPPS
- HP/HT
- Hot tapping
- Isolation
- Manifold
- Pig launching and receiving
- Pipeline
- PLEM
- PLET
- Riser module
- Xmas tree
- Chemical injection
- Hydraulic supply
