

ASSEMBLY AND TEST

BEL Valves has over 50 years' assembly and test experience serving clients within the oil and gas sector.

BEL Valves has a dedicated large scale assembly area comprising of two 4.4 meters wide and 8.4 meters high test bays, 50 tonne overhead crane, high door access and customised tooling, all managed by time-served personnel.

SERVICES

- 9/16" high pressure tube/control pressurising up to 30,000psi/ 2068 Bar
- Hydro Test Fluid Supply (with rust inhibitor/wetting agent)
- 150 LPM hydro line pressurising up to 40 psi/ 2 Bar
- Low pressure hydro pump pressurising up to 6,000 psi/ 413 Bar
- High pressure hydro pump pressurising up to 30,000 psi/ 2,068 Bar
- Nitrogen gas feed pressurising up to 6,000 psi/ 413 Bar
- Nitrogen gas booster pressurising up to 22,500psi/1551 Bar
- Dry compressed air pressurising up to 150 psi/ 10 Bar
- Helium supply points
- 50 tonne overhead crane

EUROTHERM 6180A RECORDER

- Up to 125ms capture rate
- 24 input channels for recording pressure, temperature, torque and turn count
- Networked for remote viewing
